

2 Position hydraulic ring indexing chuck

- 3 self centering and 3 compensating jaws
- large evacuation windows for easy chip flow
- fully automatic and controlled indexing
- hydraulic actuation

Application/customer benefits

- Machining of couplings in one set up
- Indexing 180° in 2 seconds
- 6 jaw clamping for perfect roundness of the coupling = ideal for premium threads
- High-low clamping (roughing-finishing)

Technical features

- Hydraulic, automatic ring indexing chuck
- All functions controlled by proximity switches
- Extremely accurate and rigid indexing mechanism
- For external clamping only
- Automatic central lubrication

Standard equipment

Chuck with mounting bolts

Ordering example

SF-RAZ 950-3+3 A 20

Accessories

Hydraulic manifold including electric manifold, hose kit

Machining of a coupling in 1 set up:

Fig. 1

Clamping the coupling on the outside diameter with 6 jaws (3 self centering and 3 compensating jaws) and machining the thread on side 1.

Fig. 2

Indexing the chuck 180° with the coupling remaining clamped.

Fig. 3

After indexing 180°, machining the thread on side 2.

Fig. 4

3 self centering jaws center and clamp the coupling.

Fig. 5

When the coupling is centered and clamped, 3 compensating jaws clamp the coupling additionally to distribute the total clamping force onto 6 jaws = less deformation of the coupling/perfect roundness of thread.

Main dimensions and technical data

Data sheet shows no jaw dimensions and radial covers for switches and adjustments
Data sheet shows only general dimensions!

Subject to technical changes
